Washington, D.C.

PRICE LIST NO. 3

AUGUST 1, 1919

TERMS: All seeds sold for cash or shipped C. O. D. when order is accompanied by a remittance of one-fourth the amount of the order.

OUR GUARANTEE: While no seedsman guarantees the crop in any way, we do guarantee all our seeds to be exactly as represented and of good germination when you get them. Examine your seeds promptly on their arrival, and if for any reason they are not entirely satisfactory, return a sample to us, giving us your full reason for doing so. You may return the seeds to us and we shall cheerfully return any money that may be due you.

You Can Make More Money

If you will plant the selected and tested seeds that often yield two and three times as big and fine a crop as the untested kinds.

Pittman & Harrison Seeds come from the fields and gardens of the most reliable growers. Then we test all our seeds in a modern germinator as they are brought into the house, and if they do not show a high percentage of germination, they are not sent out to you.

Our methods and equipment safeguard your seed results, and we give you all the guarantee that any Seed Dealer gives—it's simply this: We guarantee the seeds you get from us to be in good condition, of good germination, and just as represented when you receive them. If not, we will gladly refund your money promptly and take back the seeds.

Of course, no Seed Dealer guarantees the crop, and you don't expect that, but you do have a better assurance of getting good results from the better seeds that are backed up by reliable growers and dealers.

Now is the Time to Start

Your planting for Fall—and see what a big saving in feed and grocery bills you can make.

Use this list as your guide and take your pencil and check off just what you want—then copy it on the order blank.

We'll be glad to ship you the seeds promptly, but there'll be a lot of planting this Fall and IF YOU WANT TO BE SURE TO GET YOUR SELECTIONS, MAIL YOUR ORDER NOW.

GARDEN SEED SECTION

IMPORTANT NOTICE: All prices quoted in this section are postpaid except those on Beans, Roots, Stock Beets. Prices on these are f. o. b. Sherman. Should you desire to order any of these, to be sent by parcel post, by referring to parcel post map and table of rates in our catalog, you can easily figure amount of postage required, and include same in your remittance. Please do not fail to do this, for, otherwise, your order will be delayed. Also remember that for every 25c or fraction thereof required for postage one cent additional is required for a revenue stamp, so if the postage amounts to from 25 to 49 cents include 2c for tax, 50c to 74c, 3c and so on.

Plant a Fall Garden This Year

IT WILL SURPRISE YOU TO KNOW WHAT YOU CAN PLANT IN YOUR FALL GARDEN WITH A REASONABLE ASSURANCE OF SUCCESS

Here's WHAT and WHEN you can Plant for Fall in the South and Southwest.

BEANS—Quick maturing Bush varieties should be in every garden.

CABBAGE and CARROTS—Plant in August and in the lower South in September.

WINTER LETTUCE—Plant fall varieties of Lettuce in the lower South in September and October.

MUSTARD—Is safe to plant in your fall garden.

PARSLEY—Can be planted as late as September and October over the South generally.

PEPPERS—Should be planted in the lower South in early August.

ONIONS—Plant the first of September or October.

RADISHES—Can be planted as late as September and early October.

SPINACH—Is easily grown in our climate. Plant it any time up to November.

BUSH VARIETIES of SQUASH—Unusually do well in the middle and lower South when planted in early August.

TOMATOES—Often make good in middle and lower South when planted in early August.

TURNIPS—Of course you'll want turnips for the family and RUTA BAGAS for the stock.

There are many other vegetables you can plant in your Fall Garden with a reasonable assurance of success, but we have carefully selected the safest kinds and enough of them to give you a pretty fair variety of food for your Fall and Winter table.

Prepare your ground ahead of time. Plant the right varieties at the right time and then care for your garden just like you **meant business**.

If you plant a garden Every Fall you are sure to make your land pay good dividends.

Begin this Fall—Start Right Now.

TURNIPS—*Postpaid*

Turnips are the most satisfactory Fall Garden crop for the South and Southwest. They thrive best in cool weather and will furnish you with fresh, tender turnips for your table through a long growing season this Winter, if you will put in two or three plantings about two or three weeks apart.

Both the turnip root and the greens are fine for feeding stock and poultry.

Put in a good big patch of turnips this fall.

	Pkt.	Oz.	1-4 Lb.	1-2 Lb.	1 Lb.

FIELD SEED SECTION

Plant Some of These Crops in Your Land This Fall

All Will Thrive in the South

Enrich your land with Legumes and Cover crops. Plant Grasses, Millet, Rape, Clover and Rye for green winter feed, and protect your land from weeds and leaching while you are at it.

Alfalfa is the most profitable Southwestern fall crop when planted in properly prepared, well drained land—and it's the greatest soil enricher. If you haven't got a good-sized Alfalfa plot, start one this fall.

Clovers, Hairy Vetch and Cow Peas are other Legumes we recommend that will put nitrate into your soil and make fine winter feeding for your stock when feed prices are highest.

Rape is a popular green winter feed for stock and poultry.

Rye and Barley are great Cover crops and will afford fine winter pasture for all kinds of stock.

Rosen Rye and Abruzzi Rye are the most profitable Southern varieties. We recommend **Rosen Rye** as the **Best Rye We Know**.

Millet for forage has proven very successful in this climate when planted in August.

Grasses—We list a good variety of grasses and we specially recommend **Sudan, Kentucky Blue Grass, Rescue Grass, Italian Rye Grass, Perennial Rye Grass**. **Sudan** should be planted Right Now. Not later than early August unless you live in the lower South.

Most of these crops will enrich your soil. **All of them** will produce good winter feed when feed prices are highest—and all of them will protect your land from weeds and leaching.

This is the time to start. You should prepare your ground right now. Get your Seeds in Plenty of Time.

Unless otherwise specified, all prices are f. o. b. Sherman

RYE—*Recleaned*

ROSEN RYE

This is the Rye that was brought from Russia. It's away ahead of American Ryes. Has already been tried in Texas, and has proven to be the biggest yielder we have ever seen. Rosen Rye beats Abruzzi and all the other Southern Ryes—and it has great big plump kernels.

You can plant Rosen Rye this fall with our recommendation. Our supply is limited, so Get Your Seed Early.

VETCH

This is What They Think of Our Hairy Vetch

"Your Hairy Vetch is blooming most freely on the poorest soil. I think it the most promising crop for green soiling I have ever seen, as it makes a great growth that can be plowed under early enough to plant Cotton or Peanuts and other crops."—A. D. Jackson, Denison, Texas.

It's Not Much Trouble

Put a few of your friends' names on the order blank when you send it in—and we'll send them our 1919 Catalog, so they can get Tested Seeds, too.

Why We Should All Plant More This Fall

Bill Doubter

Bill Doubter knows better. He never plants much land to fall crops and don't ever waste his time on a fall garden. He says the chances are crops "won't do much good nohow." So about all Bill ever raised that he can call his own "fer keeps" is a mortgage on his place.

Prices of vegetables and feed-stuffs are going to be mighty high this Fall and Winter.

The only way to make the most money out of the situation is to plant all your available land to crops and raise a big Fall garden.

Good Seeds are the Most Important thing about your crop. Get them from growers and dealers who test them for fine crops and test them for germination.

Read this list carefully.

You'll find what you

John Prosper

John Prosper didn't have enough sense to know the chances were "agin" him, so he just goes ahead and plants his land to crops **every fall** and raises a big fall garden for his own table, then sells some in the winter when the prices are high—and John's already got a farm or two and now he's buying another one.
